Marsh Park Proposal

To: MRCA

Date: January 13, 2013

This proposal includes:

- *160 feet total of fencing, including gate entrances.
- *All steel and welding required to construct above.
- *Painting or powder coating of the finished work.
- *Supervision of rock placement, however long that takes.
- *Provisions of a monthly fee of \$15,000 for four months from the date of setting the posts.
- *Final payment of \$5,000 at completion of project.
- *My best efforts and the intention to produce a work that attracts visitors to the river. It is a new and exciting idea to present a park entrance from the river access, as all other park entrances have been located at street access points. This project has the potential to be my best river entrance yet.

This proposal DOES NOT include:

- *Installation of posts.
- *The rocks.
- *Design fee (FYI, most recent fee paid by City of Long Beach was \$11,000 for gate design and \$3,000 for the fence panel design.)
