

Primary fill area, but only as needed

Use fill slope to reinforce durability of road

Intended flow lines for reference only - goal is to maximize flat wash area, not create defined channels

Regrade/realign access road

No grading within 15' of oak dripline (need to verify if these are oaks)

Maximize wash area

Fill as needed only to divert water from existing flow line and across road to new wash area

Not A Part

Fill as needed only to elevate road above flow

At end of existing native vegetation
